| This project is built using the PHP programming language with the Laravel 11 framework. This project functions to record the presence of BNPB employees and various other data. This project is connected to the presence hardware using the face (HCP) |                     |

**Acta Ti - HIMA TI STT Terpadu Nurulfikri** [🔗](#)**Jun 2024 - Jul 2024**

This project is built using the PHP programming language with the Laravel 11 framework. This project aims to record the administrative activities of the Informatics Engineering Student Association of the Integrated Nurul Fikri STT.

**Indonesian Taekwondo Database Application****Dec 2023 - May 2024**

The Indonesian Taekwondo Database Application is a web-based application developed using Laravel 10 by a team of three developers. It is designed to record various aspects of Taekwondo in Indonesia, including athlete data, coach information, and match details. The project is currently in the development stage.

**Landing Page Raimuna Nasional XII tahun 2023** [🔗](#)**Apr 2024 - Apr 2024**

The Raimuna Nasional (Rainas) project is a website created for the selection test of the Public Relations Unit of the National Scout Council. This project, developed using HTML, CSS, JavaScript, jQuery, Bootstrap, and Animated.style, showcases the national scouting event that gathers Scouts from across Indonesia every four years. The event for this year took place at Bumi Perkemahan Cibubur from August 14 to 21, 2023. The project can be accessed via the following link:

**Jarvis Resto App****Sep 2023 - Sep 2023**

Jarvis Resto is a web application developed using Laravel 10 for a final project at Jarvis Camp. The app allows users to view restaurant menus and place orders online, offering detailed menu information and a streamlined ordering process. It also aids restaurants in managing orders more efficiently, showcasing both technical skills and effective teamwork from the development team.

**LMS ASA Coding Courses** [🔗](#)**Jul 2023 - Sep 2023**

LMS ASA Coding Courses is an online learning platform developed by ASA Coding to provide interactive and cutting-edge programming education. The platform enables students to book classes, access learning materials, take exams, and complete assignments efficiently. It offers a range of programming courses, from beginner to advanced levels, with certification recognized in the industry. Additionally, it supports instructors in managing classes and providing feedback, ensuring a structured and high-quality learning experience.

**DoD Project Website****Jul 2023 - Jul 2023**

The DoD (Discovery of Depok) project is an initiative to promote the beauty of Depok through an informative and interactive website, offering details on tourist attractions, cultural events, and community activities. It also provides ticket booking services for tours and accommodations, helping visitors plan and enjoy stay in Depok.

**Anime App Project****Jul 2023 - Jul 2023**

The Anime App Project is a web application developed using Laravel 10 to fulfill a client's college assignment, focusing on providing anime information and online streaming. Featuring a user-friendly interface and comprehensive functions, it offers detailed anime info, episode lists, user reviews, online streaming, bookmarking, advanced search, and community features for sharing experiences and recommendations.

**Movies App****Jul 2023 - Jul 2023**

The Movies App is a website project built with Laravel 10 for a client's college assignment, focusing on anime information and online streaming. It offers detailed anime synopses, episode lists, user reviews, and streaming capabilities, providing a responsive and user-friendly experience. The project combines practical application of academic concepts with delivering valuable anime information and entertainment to users.

**E-Faktur App** [🔗](#)**Dec 2022 - Dec 2022**

It is a website-based application built using native PHP with a MariaDB database. This application functions to record finances and billing.

**Bimba App****Jun 2022 - Jul 2022**

Bimba App is a web-based project designed to support financial and administrative management for biMBA-AIUEO branches. This PHP-based application enables efficient tracking of financial transactions, including income, expenses, and SPP payments, across multiple branches. Key features include detailed financial record-keeping, SPP management, income tracking, and comprehensive financial reporting, helping biMBA-AIUEO enhance its financial operations and support its educational mission.

**Kampoeng Wisata Djampang Web** [🔗](#)**Jun 2022 - Jun 2022**

Kampoeng Wisata Djampang is a sustainable tourism initiative managed by Dompot Dhuafa, covering 25 km<sup>2</sup> across 3 sub-districts to offer authentic travel experiences. The WordPress website provides detailed information on attractions, community activities, and services, while also promoting local economic empowerment through skill development programs. The site aims to expand public awareness and highlight the area's cultural and natural diversity.

**Aqilah Baby Shop App****Feb 2022 - Mar 2022**

Aqilah Baby Shop App is a Point of Sale (POS) application designed using PHP to streamline sales, inventory, and operations management for Aqilah Baby Shop. It integrates both offline and online sales channels, offering features such as inventory management, sales tracking, customer management, and financial reporting. This app enhances operational efficiency and customer experience, supporting the shop's growth in the baby and children's products industry.

**RIRBCBogor App****Jan 2022 - Feb 2022**

RIRBCBogor App is a Point of Sale (POS) system built using PHP, designed for RIR BC Bogor, a fashion store specializing in Muslim and Muslimah clothing. The app streamlines inventory management, sales transactions, and financial monitoring with intuitive features, offering detailed reports to enhance sales performance and strategic decision-making. This tool helps RIR BC Bogor operate more efficiently and improve customer service.

**Website Bogor Digital Academy** [🔗](#)**Sep 2021 - Sep 2021**

the task involves designing and developing a Company Profile website for Bogor Digital Academy using HTML, CSS, and Bootstrap. The site provides a professional and informative online presence for the startup, focusing on digital training and education. Bootstrap ensures responsiveness across devices, while the aesthetic and intuitive design allows easy navigation, showcasing the academy's courses, services, and contact information to enhance online visibility and market reach.

**Website Habbacov Company Profile** [🔗](#)**Jul 2021 - Jul 2021**

In this project, a modern, responsive Company Profile website was developed using HTML, CSS, and Bootstrap. It serves as the online face of the company, presenting information about its identity, vision, and mission. The site ensures easy navigation, showcases the product and

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                            |

| This project involves creating a WordPress blog to promote Habbacov, a herbal product combining honey and black seed extract to enhance health. The site provides product details, health articles, customer testimonials, and online purchasing options to inform and engage potential customers.                                                                                                                                                                                                                              |                            |
| <b>Website Creativertisa</b> <a href="#">↗</a>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | <b>Jun 2021 - Jun 2021</b> |
| In this project, Creativertisa designs and develops a modern, responsive Company Profile website using HTML, CSS, and Bootstrap. The site serves as an online representation of Creativertisa's vision, mission, and digital services, offering an intuitive and aesthetically pleasing navigation experience. Bootstrap ensures the website's responsiveness across devices and reflects the company's professional image, showcasing its portfolio and providing clear contact information to potential clients and partners. |                            |
| <b>Website Ar Rasyid Subang</b> <a href="#">↗</a>                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <b>Jun 2021 - Jun 2021</b> |
| The Ar Rasyid Subang website, built on WordPress, provides comprehensive information about the school's educational programs, activities, and mission. With a user-friendly design, it offers easy access to updated content, school achievements, and photo galleries, reflecting the Islamic educational values and promoting transparency and pride within the school community.                                                                                                                                             |                            |
